

Snowman Directions

First you draw a big circle for part of the body, you can go into shapes and use a circle) put it on the bottom of page.

Then you draw meduim circle for another part of the body, right on top of the big circle.

Now to finish the body, you need to draw a small circle for the head, right on top of the medium circle.

Now you need to draw two black eyes, on the face around the top. Then you draw a orange isosceles triangle for the nose, a little under the eyes.

Then to finish the face you need to draw 5 black dots under the nose, for the mouth, make it into a smile.

Then color your background a lite/dark blue color, and put it as the background color.

Then go down to the medium circle and draw 1 dot towards the middle top, then 1 dot a little ways under that, then another dot under that one, towards the bottom, so you should have 3 dots on the middle circle.

Then on the middle circle on the outside you draw 2 brown arms on each side for the arms, then you draw 1 line very small for 1 finger going up, then you draw another going straight as the arm, then another one going down, like the one going up.

Then on the other side of the snowman you do exactly the same thing. Then you take a black and go down along the bottom and make curvy lines for snow, then go along it again with white, and then you have snow.

Then you draw 3 big snowflakes/stars, then draw 8 meduim and small star snowflakes.
